

## **VI.5 PARKS AND RECREATION FACILITIES**

### **System Description**

Recreational opportunities in Mason County include parks for day-use activities and overnight camping; fresh and salt water areas for boating and other water sports; facilities and equipment for sports and play activities; and wilderness areas and other open spaces for hiking, hunting, and horseback riding.

Existing parks and recreation facilities in Mason County are available through a variety of public and private entities. Federal and state facilities include camping, boating, and day-use parks. The County-owned park system includes day-use and water access facilities, sports fields, and related recreational areas. Other agencies providing park and recreational resources include municipalities, port districts, and public schools. Some private recreational facilities are open to the public as well.

### *County Park Facilities*

The County currently manages 18 park properties in Mason County two of which are undeveloped, and three others have large portions which are also undeveloped. Of the developed parks, two are large baseball/softball complexes, five provide saltwater access parks, two are located on freshwater lakes, and three provide upland day use and recreation facilities (see FIGURE VI.5-1). In addition to the day use facilities, the County also owns and maintains one above-ground skate park. The conditions of these facilities vary by location, however, significant investment in facilities has been made in the last two years from Real Estate Excise Tax proceeds (REET 2). The capital plan for the next six years continues this trend of investment in park development and facility upgrades. The heavy use and demand from both county and non-County residents are particularly high during the spring and summer.

In recent years, parks operated by Mason County have received substantial increases in visitors. Total visits increased 52 percent from 1992 to 1993, from 180,600 to 274,500 annual visits. Nearly half of the total increase was at Sandhill Park, a sports park in Belfair. Sandhill's visitation increased by 230 percent, from 20,300 to 67,000 visits, due in large part to increased use of the park by local baseball, softball, and soccer leagues. Mason County Recreation Area, the largest baseball/softball complex has grown in use the last several years and is now recognized regionally as a preferred site for major tournaments.

There are no facilities for overnight camping throughout the Mason County Parks system. The last county-wide park plan was developed in 1991 and subsequently updated in the late 1990s. Funding is being provided to develop a new county-wide parks plan in 2006. The

previous plan recommended two sites for development as overnight camping facilities, Truman Glick Memorial Park and Mason Lake Park. Camping options will be examined in the long-term development plan being crafted for these and other park properties with large portions of undeveloped land.

**Inventory**

An inventory of all Mason County parks including federal, state, private, and County-owned parks is listed in TABLE VI.5-1. Also included are the number of acres and amenities available at each park location. The locations of parks and recreational facilities operated by the County are shown on FIGURE VI.5-1.

**Facility Needs**

As part of the 1991 parks plan, a list of system deficiencies, future project and improvement needs, and costs was developed. The improvements identified incorporate LOS standards promulgated by the National Recreation and Parks Association (NRPA). These standards and deficiencies will be revisited in 2006, with the development of the new county-wide parks plan. The previous standards are provided below are for park planning purposes and as targets to provide guidance to future capital decisions by the county. They are not intended to identify capital facilities which are necessary for development, and they are not intended to be used in the review of individual projects. Also shown below for comparison purposes are standards used by other counties similar in population size. These standards, shown in TABLE VI.5-2, are important considerations for procuring funding from park and recreation resource agencies. This framework continues to provide the basis for developing a list of improvement requirements and project facility needs on a county-wide basis. In addition, the County recently developed a Master Trails Plan which provides policy guidance and direction in seeking additional trail development throughout the County. Further refinement of facility needs will occur with the development of the new parks plan and through the integration of the new plan with park standards, the Master Trails Plan, and site-specific long-term development plans. A list of these facility needs, incorporating anticipated sub-regional growth, as developed for the previous parks plan is detailed in Section VI.10, Finance Plan, along with potential finance options for these facilities.
